

## Product Update: IV Stand

### Stand now features enhanced metal and rubber casters for improved maneuverability and durability.

**Enhanced Durability:** Our IV stand's rubber casters are designed to withstand the rigors of daily medical use, offering increased longevity, and reducing the need for frequent replacements.

**Quieter Operation and Enhanced Mobility:** New rubber casters on our IV stand reduces noise during transportation and positioning, with improved mobility and maneuverability.

**Floor Protection:** The introduction of rubber casters protects floors, safeguarding your medical facility's aesthetics and minimizing maintenance costs.

**Reduced Vibration:** The rubber caster design effectively dampens vibrations during movement, maintaining a steady platform for medical instruments and preventing potential disturbances during delicate procedures.

**Improved Hygiene:** New caster design is easier to clean and disinfect compared to previous plastic version, contributing to a higher level of hygiene compliance in sterile medical environments.
