

Product Update: Mayo Stand

Stand now features enhanced metal and rubber casters for improved maneuverability and durability.

Enhanced Durability: Our mayo stand's rubber casters are designed to withstand the rigors of daily medical use, offering increased longevity, and reducing the need for frequent replacements.

Quieter Operation and Enhanced Mobility: New rubber casters on our mayo stand reduces noise during transportation and positioning, with improved mobility and maneuverability.

Floor Protection: The introduction of rubber casters protects floors, safeguarding your medical facility's aesthetics and minimizing maintenance costs.

Secure Locking: Secure locking metal mechanisms allows for easy and reliable fixation in place, promoting stability during procedures.

Reduced Vibration: The rubber caster design effectively dampens vibrations during movement, maintaining a steady platform for medical instruments and preventing potential disturbances during delicate procedures.

Improved Hygiene: New caster design is easier to clean and disinfect compared to previous plastic version, contributing to a higher level of hygiene compliance in sterile medical environments.
